Profile

Software Engineer focused on **backend systems, APIs**, and production-ready applications. Currently contributing to EV charging infrastructure software, developing backend services, automated testing solutions, and scalable platform features using **ASP.NET Core, GraphQL, Python**, and modern engineering practices.

Professional Experience

Software Engineer, Zero Impact Solutions 11/2025 – Present | Beirut, Lebanon

- Contribute to the development and maintenance of **backend services** supporting **EV charging** infrastructure platforms.
- Design, implement, and enhance features using ASP.NET Core, GraphQL, REST APIs, SQL Server, and microservice-based architectures.
- Develop and maintain **automated tests** using **xUnit** to improve system reliability and reduce regressions.
- Investigate, troubleshoot, and resolve production issues and customer-reported defects.
- Collaborate with engineers, QA, and product stakeholders to deliver new functionality and platform improvements.
- Participate in code reviews and contribute to **code quality**, maintainability, and engineering best practices.
- Improve system **performance**, reduce technical debt, and support the scalability of **production** services.
- Work within Agile development processes using **Azure DevOps** for planning, tracking, and delivery.

Skills

Languages: C#, Python, JavaScript, SQL

Backend: ASP.NET Core, FastAPI, GraphQL, REST APIs, Node.js

Frontend: React, Flutter, React Native, Next.js

DataBases: SQL Server, SQLite, MongoDB, MySQL, Postgres

Testing: xUnit, pytest

Domain Knowledge:
OCCP, EV Charging Systems

Tools: Git, GitHub, Azure DevOps

Education

Bachelor of Science in Computer Science,
Lebanese University (LU)

2022 – 2025 | Tripoli

Languages

- Arabic
- English
